Please refer to the 'Risk Factors Section' of the Prospectus for further details.

Each potential investor in these Debentures must determine the suitability of investment in light of its own circumstances. In particular, each potential investor may wish to consider, either on its own or with the help of its financial and other professional advisers, whether the investor:

A potential investor should not invest in these Debentures unless the investor has the expertise (either alone or with its financial and other professional advisers) to evaluate how the Debentures will perform under changing conditions, the resulting effects on the value of the Debentures and the impact this investment will have on the potential investor's overall investment portfolio."

5.3 OBJECTIVES OF THE ISSUE

The primary objective of the issue of the said Debentures is to strengthen the Tier 2 Capital base of the Bank in accordance with BASEL III requirements. The Bank intends to utilize the entire proceeds of the issue to grow the loans and advances portfolio through diverse lending products in the ordinary course of the Bank over a period of twelve months from the date of allotment or 31st December 2018 whichever is earlier.

Until such credit demands are fully met, the proceeds would be invested in government securities which are risk free investments. They would be invested at the current market rates and are expected to generate a return at the rate of approximately 9.00% p.a. to 9.50% p.a.

The monthly average disbursement of funds in loans and advances (excluding overdrafts, revolving imports loans and short term loans) during the three months of the quarter ended 31/12/2017 was approximately Rs. 14 Bn. It should be mentioned that the Bank experienced a net loan growth of Rs. 44.8 Bn during the year 2017.

The cost associated with the Debenture would be compensated by the income generated from the funds raised and the benefits derived from having a strong regulatory capital.

Present status of the Bank with respect to Capital Adequacy under BASEL II and BASEL III

BASEL II

The Bank is currently in compliance with the BASEL II regulatory requirements for Capital Adequacy as at 30th June 2017 as set out below:

The Bank needs to take appropriate action to comply with the same based on Table 1 (Capital requirements for Banks with Total Assets less than Rs. 500 Billion) of the said Direction. The Bank is in compliance with BASEL III requirement as at 01.07.2017.

This has been estimated by considering the assets growth as per the Budget 2018 and the impact arising from SLFRS 09 implementation.

Approval has been obtained from the Central Bank of Sri Lanka to include the Debentures as Tier 2 capital of the Bank. Strengthening the Tier 2 Capital will facilitate the Bank's envisaged asset growth whilst maintaining its Capital adequacy at satisfactory levels.

Further, the Bank has obtained the shareholder approval by way of a special resolution for the issuance of any shares which may be occasioned by the occurrence of a 'Trigger Event'. Further as per the Rule 2.2.1 (k) of the CSE Listing Rules, the Bank has obtained the shareholder approval by way of a special resolution at the Extraordinary General Meeting of the Bank held on 15th February 2018 for the issuance of the Debentures.

The Bank, as at the date of the Prospectus has not recognized related parties for the lending of the proceeds of the Issue. As such, the Bank will disburse the proceeds of the Issue in the ordinary course of business. However, in the event, funds are lent to related parties in future, such lending will be done in accordance with Section 9 of the CSE Listing Rules.

Note: The entirety of the cash flow from the Debenture proceeds will be considered as "Tier 2 Capital".

The Bank has utilized the proceeds of all previous Debenture Issues towards achieving the objectives of the respective Issues.

Utilisation of Debenture Proceeds

The utilization of the proceeds from the Debenture Issue will be disclosed in the Interim Financial Statements and the Annual Report of the Bank from the issue opening date until the objective of the Debenture Issue with respect to the utilization of the proceeds are achieved. The disclosure would contain the information as per following template:

Debenture Issue proceeds utilization as at dd-mm-yyyy

In the event the proceeds raised are fully utilized in terms of the objectives disclosed in the Prospectus prior to submission of the company's next immediate financial statements (i.e. either interim financial statements or annual report), the company will disclose the fact that proceeds have been utilized in its entirety as per the above template.

Note:

If there are any changes occurring in circumstances due to specific risks relating to objectives of the Debenture issue as highlighted in section "Risks Relating to Objectives of the Debenture Issue", the Company may use the funds appropriately, i.e. if funds are not utilized for loan growth within the specified timeline, they will be invested in Government Securities for which no further approval from Debenture Holders will be sought, as same is not required.

Risks relating to the objectives of the Debenture Issue;

As the primary objective of the Bank is to carry on the business of lending or advancing of money, the business of lending to customers whether they are related parties or not, are recurrent transactions carried out in the ordinary and usual course of business of the Bank. Nevertheless, the Bank has an internal threshold on exposure to related parties against its regulatory capital and therefore the exposure will be limited to such threshold limit.

Since the proposed Debenture Issue is to raise up to Rs.10 Billion and as there is a demand for credit there is no specific risk factor that may lead to non-achievement of the objective of the Issue. In the event the

objective of raising Tier 2 capital is not achieved fully, the Bank would have to restrict itself to a slower growth in the future. However, the Bank would be able to supplement this requirement to a certain degree with retention of expected profits.

The risk of under subscription of the Debenture Issue will be greatly mitigated by the strong financial performance of the Bank as the Issuer.

However, if the Bank is unable to lend these funds within the 12 months from the date of allotment or 31st December 2018 whichever is earlier due to subdued credit growth, the funds that would be raised would be invested in Government Securities at zero default risk until credit demands are fully met. Further, Bank does not identify any specific risk factor that may lead to non-achievement of expanding the loans and advances portfolio through diverse lending products within the specified time line with the proceeds of the Issue up to a maximum of Rs.10 Bn.

In the event the Bank does not utilize the funds raised for the stated objectives and proposes to utilize the same for another objective or objectives, it will issue an announcement to that effect and take steps to seek shareholder approval prior to such utilization.

RTGS transfers however could be effected only for amounts over and above the maximum value that can be accommodated via SLIPS transfers (i.e. LKR 5,000,000/- as of the date of this Prospectus).

However, in the event such payment is over the maximum amount that can be accommodated through electronic fund transfer mechanism recognised by the banking system of Sri Lanka or if the Debenture Holder has not provided to the CDS accurate and correct details of his/her bank account for the payment of Principal Sum and Interest, such payment to the Debenture Holder will be made by way of a cheque and sent by post at the risk of the Debenture Holder.

The payment of Principal Sum and Interest will be made in Sri Lanka Rupees in favour of the Debenture Holders as of the Entitlement Date. In the case of joint Debenture Holders, the payment of Principal Sum and Interest will be made to the one whose name stands first in the register of Debenture Holders.

5.6 APPLICATION OF TAX ON INTEREST PAYMENTS

Interest on the Debentures will be paid after deducting any taxes and charges thereon (if any) as per the applicable law prevalent at the time of interest payment to the Debenture Holders.

5.7 REDEMPTION

Where the Company seeks to redeem any Type of Debentures prior to the Date of Redemption, such early redemption shall only be permitted with the prior written approval from the Director of Bank Supervision of the Central Bank of Sri Lanka and the approval of the Debenture Holders of such Type of Debentures representing three fourths (¾) of the nominal value of such Type of Debentures.

The Debenture holders shall not have any right or option to call for redemption of the Debentures before the Date of Redemption of such Debentures, except in the circumstances where the Debentures have become immediately payable in terms of Clause 10 of the Trust Deed.

On the Date of Redemption of the Debentures, the Company shall in accordance with the provisions contained in the Trust Deed pay to the Debenture Holders not later than three (03) market days from such date, the principal sum of the Debentures which ought to be redeemed and interest (if any) remaining unpaid up to the date immediately preceding the Date of Redemption of the Debentures, unless a Trigger Event as morefully described in this prospectus occurs prior to such date.

If the Date of Redemption falls on a day which is not a Market Day, then the Date of Redemption shall be the immediately succeeding Market Day and interest shall be paid up to the date immediately preceding such Market Day (inclusive of all intervening non-Market Days).

Occurrence of a Trigger Event

Upon the occurrence of the Trigger Event as determined by the Monetary Board of the Central Bank of Sri Lanka, the Bank shall be required and entitled to issue and within twenty (20) days to allot ordinary voting shares of the Bank ranking equal and pari passu with the existing ordinary voting shares to the Debenture Holders as of the Trigger Date, up to the outstanding balance of such Debentures including the total par value of the Debentures and Debenture Interest at an issue price for such ordinary voting shares which will be based on the simple average of the daily Volume Weighted Average Price of an ordinary voting share of the Bank during the three months (03) period, immediately preceding the date of the Trigger Event.

The CDS upload pertaining to Ordinary Voting Shares will be completed within 10 market days from the date of allotment of such shares. In the event of any Debenture Holder being entitled to a fractional allotment of an ordinary voting share on such issuance and allotment, the Bank shall settle such sums in cash, based on the issue price of such share within fourteen (14) market days from the date of allotment of the said ordinary voting shares.

Market Announcements

The Bank on receipt of a Trigger Event notification from the Central Bank of Sri Lanka will immediately make a market announcement of the same and further announce the conversion of the Debentures to Ordinary Voting Shares at the "conversion price" that would be determined and the relevant dates, i.e. 'cut-off dates', etc.

Conversion Price

Outstanding balance of the Debentures including the total par value of the Debentures and Debenture Interest, at an issue price for such ordinary voting shares which will be based on the simple average of the daily Volume Weighted Average Price (VWAP) of an ordinary voting share as published by the Colombo Stock Exchange during the three months (03) period, immediately

preceding the date of the Trigger Event (Any reference in this document to VWAP would carry the same meaning as explained herein).

Averaging out of the VWAP over a period of 3 months preceding the Trigger Event as opposed to a shorter window closer to the Trigger Event, is aimed at smoothing out price effects.

If the prevailing 3 month Volume Weighted Average Share Price at the time of the Trigger Event is low, it would result in a comparatively higher number of ordinary voting shares being issued to the Debenture Holders. Alternately, a higher 3 month Volume Weighted Average Share Price at the time of the Trigger Event would result in a comparatively lower number of ordinary voting shares being issued to Debenture Holders.

Compliance with applicable laws and regulations

Issue of any new ordinary voting shares due to occurrence of a Trigger Event, would be carried out in compliance with the applicable laws and regulations of Sri Lanka, including any regulations applicable on 'material interest that a shareholder may hold' in terms of the Banking Act.

Non Occurrence of a Trigger Event

The proposed Debentures will be redeemed after the expiry of the respective tenures of the Debentures, i.e five (05), seven (07) and ten (10) years from the date of allotment of such Debentures and the principal sum and unpaid and accrued interest (if any) payable on the redemption of Debentures will be paid not later than three (03) Working days from the date of redemption, unless otherwise a 'Trigger Event' occurs as detailed herein.

In the application form for subscription of Debentures the Applicants are required to irrevocably authorize the Trustee, subject to any overriding clauses in the Trust Deed to act as their agent in entering in to such deeds, writing and instruments with the Bank and to act as Trustee for the benefit of and interest of the Debenture Holders on the terms and conditions contained in the said Trust Deed.

The rights and the obligations of the Trustee are set out in the Trust Deed and the Debentures will be subject to the terms and conditions incorporated in the said Trust Deed. There is no conflict of interest arising between the Trustee or its Board of Directors and the Bank.

In terms of Rule 3.3.11 (b) of the CSE Listing Rules; the Prospectus, Articles of Association of the Bank and the Trust Deed are hosted in the Bank's website, www.seylan.lk, and the CSE website, www.cse.lk, from the date of opening of the subscription list until the Date of Redemption of the Debentures.

Furthermore, the copies of the Prospectus and Application Form will be made available free of charge from the collection points as set out in Annexure III, from seven market (07) days prior to the date of opening of the subscription list.

5.11 RISK FACTORS ASSOCIATED WITH DEBENTURES

Subscribers to the Debentures will be exposed to the following risks:

(a) Interest Rate Risk

The price of a typical Debenture will change in the opposite direction to a change in the market interest rates, assuming all other factors are equal. "Market Interest Rate" refers to the interest rate expected by investors for investments with a similar maturity and risk profile. As market interest rates rise, price of the Debentures may fall and as market interest rates fall, the price of the Debenture may rise. If an investor sells a Debenture prior to maturity when market interest rate is higher than on the Debenture interest rates, the investor may incur a capital loss. Similarly, if an investor sells a Debenture prior to maturity when market interest rate is lower than on the Debenture interest rate, then the investor may receive a capital gain. This uncertainty is known as "interest rate risk".

(b) Reinvestment Risk

The Bank shall pay interest on the Debentures semi-annually. The investor may decide to reinvest this interest payment and earn interest on interest. Depending on the prevailing market interest rates, the Debenture Holder may be able to reinvest the paid interest at a higher or lower interest rate than that is offered by these Debentures. This uncertainty is known as "reinvestment risk".

(c) Default Risk

Default risk also known as credit risk, refers to the risk that the Issuer of the debentures may default, i.e. the Issuer will be unable to pay interest and principal when due. It is advisable for prospective Seylan Bank PLC Debenture investors to take into account past earnings and asset growth performance of the Bank as reflected in the Balance Sheet of the Bank, its Risk Management Policies and the skills and experience of the Directors and Senior Management Team when forming an opinion on Default Risk.

This risk is gauged in terms of rating assigned by different rating agencies. Fitch Ratings Lanka Limited has assigned a National Long Term rating of BBB+ (lka) to these Debentures and will be periodically reviewing the same as set out in the Annexure I.

(d) Liquidity Risk

Liquidity risk depends on the ease with which Debentures can be sold after the initial placement. As the Debentures will be listed on the CSE, investors will be able to trade the instrument in the secondary market and convert it to cash, mitigating liquidity risk. However transaction price or bidask spread will be dependent upon the marketability, demand, supply and other macro factors such as market interest rates.

(e) Duration Risk

Duration is a measure of the price sensitivity of fixed income investments, to a change in interest rates based on the time to maturity of principal and coupon payments. The higher the duration, the greater the price volatility or duration risk, while a lower duration carries a lower risk.

(f) Call Risk

Call risk refers to the risk that the Issuer will retire all or a part of the principal value of the Debentures before maturity. The risk to an investor is that the timing of the call is not known and the investor will be faced with a re-investment risk in the event the call is made at a time when the market interest rates have declined.

Since these Debentures are not embedded with a call option, the Debenture would not be redeemed by the Bank prior to maturity for any reason whatsoever except due to unforeseen circumstances beyond the control of the Bank which would be directed and approved by the Central Bank of Sri Lanka.

(g) Subordination risk

The Debentures will be the Bank's direct unsecured obligations which, if the Bank becomes insolvent or is wound-up (prior to the occurrence of a Trigger Event), will rank equal with the Bank's other subordinated indebtedness and will be subordinated in right of payment to the claims of the Bank's depositors and other unsubordinated creditors. Therefore, if, prior to the occurrence of a Trigger Event, the Bank becomes insolvent or is wound-up, the assets of the Bank would first be applied to satisfy all rights and claims of holders of senior indebtedness. If the Bank does not have sufficient assets to settle claims of such senior indebtedness holders in full, the claims of the holders of the Debentures will not be settled and, as a result, the holders will lose the entire amount of their investment in Debentures. The Debentures will share equally in payment with claims under other subordinated indebtedness if the Bank does not have sufficient funds to make full payments on all of them, as applicable. In such a situation, holders could lose all or part of their investment.

In addition, holders should be aware that, upon the occurrence of a Trigger Event, all the Bank's obligations under the Debenture shall be deemed paid in full by the issuance of Ordinary Shares upon a Non-viability Conversion, and each holder will be effectively further subordinated due to the change in their status following such a conversion from being the holder of a debt instrument ranking ahead of holders of Ordinary Shares to being the holder of Ordinary Shares. As a result, upon Non-Viability Conversion, the holders could lose all or part of their investment in the

Debentures irrespective of whether the Bank has sufficient assets available to settle what would have been the claims of the holders of the Debentures or other securities subordinated to the same extent as the Debentures, in proceedings relating to an insolvency or winding-up.

ADDITIONAL RISKS ARISING FROM THE DEBENTURE BEING BASEL III NON VIABILITY CONVERSION INSTRUMENT

Risks arising from Non-Viability Conversion features

(i). Conversion Risk

It is the risk of the Bank issuing ordinary shares to the Debenture Holders in lieu of the Debenture capital and interest earned and unpaid as at a particular date upon the occurrence of a Trigger Event. In such a situation, the Debenture Holders would become shareholders of the Bank and will rank equal and pari passu with existing Ordinary Share Holders. The Bank being a systemically important Bank and the strong performances portrayed since the inception will mitigate the risk of the occurrence of a Trigger Event.

Upon the occurrence of a Trigger Event the Bank shall convert the Debentures into Ordinary Shares and any accrued but unpaid interest will be added to the par value of the Debentures and such accrued but unpaid interest, together with the principal amount of the Debentures will be deemed paid in full by the issuance of Ordinary Shares. Upon conversion the Debenture holders shall have no further rights and the Bank shall have no further obligations to holders of the Debentures under the Trust Deed. Moreover, a Non-Viability Conversion upon the occurrence of a Trigger Event is not an event of default under the terms of the Debenture or the Trust Deed.

Potential investors in Debentures should understand that, if a Trigger Event occurs and Debentures are converted into Ordinary Shares, Investors are obliged to accept the Ordinary Shares even if they do not at the time consider such ordinary Shares to be an appropriate investment for them and despite any change in the financial position of the Bank since the issue of the Debentures or any disruption to the market for those Ordinary Shares or to capital markets generally.

(ii). The number and value of Ordinary Shares to be received on a Non- Viability Conversion may be worth significantly less than the par value of the Debentures and can be variable.

Upon the occurrence of Non-viability Conversion even though Ordinary Shares of equivalent value would be initially issued at the VWAP, yet there is no certainty of the value of such Ordinary Shares to be received by the holders of the Debentures being maintained at such levels and the value of such Ordinary Shares could eventually be significantly less than the par value of the Debentures.

Moreover, there may be an illiquid market, or no market at all, in Ordinary Shares received upon the occurrence of a Non-Viability Trigger event, and investors may not be able to sell the ordinary Shares at a price equal to the value of their investment and as a result may suffer significant loss.

(iii). The Debentures are loss-absorption instruments that involve risk and may not be a suitable investment for all investors

The Debentures are loss-absorption financial instruments designed to comply with applicable banking regulations and involve certain risks. Each potential investor of the Debentures must determine the suitability (either alone or with the help of a financial advisor) of the investment in light of its circumstances. In particular, each potential investor should understand thoroughly the terms of the Debentures, such as the provisions governing the Non-Viability Conversion, including under what circumstances a Trigger Event could occur.

A potential investor should not invest in the Debentures unless he/she has the knowledge and expertise (either alone or with the financial advisor) to evaluate how the Debentures will perform under changing conditions, the resulting effects on the likelihood of the Non-viability Conversion into Ordinary Shares and the value of the Debentures, and the impact this investment will have on the potential investor's overall investment portfolio. Prior to making an investment decision, potential investors should consider carefully, in light of their own financial circumstances and investment objectives, all the information contained in this prospectus.

(iv). Uncertainty regarding the Trigger Event

Because of the inherent uncertainty regarding the determination of when a Triger Event may occur, it will be difficult to predict when, if at all, the Debentures will be converted into Ordinary Shares. In addition, investors in the Debentures are likely not to receive any advance notice of the occurrence of a Non-Viability Trigger Event. As a result of its uncertainty, trading behavior in respect of the Debentures is not necessarily expected to follow trading behavior associated with other types of convertible and exchangeable securities. Any indication, whether real or perceived, that the Bank is trending towards a Trigger Event can be expected to have an adverse effect on the market price of the Debentures and the Ordinary Shares, whether or not such Trigger Event actually occurs. Therefore, in such circumstances, investors may not be able to sell their Debentures easily or at prices that will provide them with a yield comparable to other types of subordinated Debentures, including the Bank's other subordinated debt securities. In addition, a Non-Viability Conversion could drive down the price of Ordinary Shares subsequent to the conversion itself arising from the additional shares in issue of the Bank.

(v). Following a Non-viability Conversion, investor will no longer have rights as a creditor and will only have rights as a holder of Ordinary Shares

Upon a Non-Viability Conversion, the rights, terms and conditions of the Debentures, including with respect to priority and rights on liquidation, will no longer be relevant as all such Debentures will have been converted on a full and permanent basis into Ordinary Shares ranking pari passu with all other outstanding Ordinary Shares. If a Non-Viability Conversion occurs, then the interest of depositors, other creditors of the Bank, and holders of Bank securities which are

not contingent instruments will all rank in priority to the holders of contingent instruments, including the Debentures.

Given the nature of the Non-Viability Trigger Event, a holder of Debentures will become a holder of Ordinary Shares at a time when the Bank's financial condition has deteriorated. If the Bank were to become insolvent or wound-up after the occurrence of a Non-viability Trigger Event, as holders of Ordinary Shares investors may receive substantially less than they might have received had the Debentures not been converted into Ordinary Shares.

(vi). An investor's remedies for the Bank's breach of its obligations under the Debenture are limited

Absent an Event of Default (which shall occur if the Bank becomes insolvent or bankrupt, the Bank goes into liquidation either voluntarily or under an order of a court of competent jurisdiction, or the Bank otherwise acknowledges its insolvency), the trustee and holders of Debentures shall not be entitled to declare the principal amount of the Debentures due and payable under any circumstance. As a result, the investor will have no right of acceleration in the event of a non-payment of interest or a failure or breach in the performance of any other covenant of the Bank, although legal action could be brought to enforce any covenant given by the Bank.

(h) Acknowledgement of the CBSL Resolution Powers

The CBSL retains full discretion regarding the determination that a Trigger Event has occurred;

The Monetary Board determines the Trigger Event and effects a conversion after considering the other bail-in alternatives available to the bank. Further, Section 30 and 30(9) of the Monetary Law Act No.58 of 1949 (as amended) and Part VII (A) and Part VIII of the Banking Act No.30 of 1988 (as amended) specify certain events upon which Monetary Board can exercise its resolution mechanism. In view of the above, based on the statutory authority of the Monetary Board, CBSL retains full discretion to choose or not to choose to trigger for Non-Viability as has been provided for in the Banking Act Direction No.1 of 2016 on Capital Requirements under Basel III for Licensed Commercial Banks and Licensed Specialized Banks.

As the CBSL retains full discretion to choose not to trigger Non-Viability Conversion notwithstanding a determination that the Bank has ceased, or is about to cease to be viable, under such circumstances, the holders of the Debentures may be exposed to losses through the use of other resolution tools under applicable statutes.

(i) Generic risks

(i) The ability to transfer the Debentures may be limited by the absence of an active trading market, and there is no assurance that any active trading market will develop for the Debentures

In Sri Lanka the secondary trading activity in the corporate debt market is limited. The Debentures are a new issue of securities and have no established secondary trading market.

Further, the secondary market trading is only limited to Qualified Investors as defined in the Prospectus. There can be no assurance that an active secondary trading market will develop. If the Debentures are traded after their initial issuance, they may trade at a discount to their initial offering price, depending upon prevailing interest rates, the market for similar securities, general economic conditions and the financial condition of the Bank.

Even if an active secondary trading market does develop, it may not be liquid and may not continue. Therefore, investors may not be able to sell their Debentures easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. If the secondary market for the Debentures is limited, there may be few buyers for the Debentures and this may significantly reduce the relevant market price of the Debentures.

(ii) Credit ratings may not reflect all risks associated with an investment in the Debentures

A credit rating reflects a relative ranking of credit risk and does not reflect the potential impact of all risks related to the structure, market, additional factors discussed herein, and other factors that may affect the value of the Debentures.

(iii) A Downgrade, suspension or withdrawal of the rating assigned by any rating agency to the Debentures could cause the liquidity or market value of the Debentures to decline

Rating initially assigned to the Debentures may be lowered or withdrawn entirely by the rating agency if, in the rating agency's judgment, circumstances relating to the basis of the rating, such as adverse changes to the Bank's business, so warrant. If the rating agency lowers or withdraws its rating, such event could reduce the liquidity or market value of the Debentures. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

(iv) Changes in law, or changes in regulatory classification may affect the rights of holders as well as the market value of the Debentures

The regulatory regime in connection to these instruments is evolving. Changes in law may include change in statutory, tax and regulatory regimes during the life of the Debentures, which may have an adverse effect on the investment in the Debentures.

5.12 BENEFITS OF INVESTING IN THE DEBENTURES

- Provides the investor with an opportunity to invest in Debentures issued by a Commercial Bank in Sri Lanka.

5.13 TRANSFER OF DEBENTURES

- (a) These Debentures shall be freely transferable amongst Qualified Investors as long as the Debentures are listed in the CSE and the registration of such transfer shall not be subject to any restriction, save and except to the extent required for compliance with statutory requirements.
- (b) Subject to provisions contained in the Trust Deed, the Bank may register without assuming any liability or any transfer of Debentures, which are in accordance with the statutory requirements, rules and regulations in force for the time being as laid down by the CSE, SEC and the CDS.
- (c) In the case of the death of a Debenture Holder,
 - The survivor where the deceased was a joint holder; and
 - The executors or administrators of the deceased (or where the administration of the estate of the deceased is in law not compulsory, the heirs of the deceased) where such Debenture Holder was the sole or only surviving holder; shall be the only persons recognised by the Issuer as having any title to his/her Debentures.
- (d) Any person becoming entitled to any Debenture in consequence of bankruptcy or winding up of any Debenture Holder, upon producing proper evidence that such Debenture Holder sustains the character in respect of which such Debenture Holder proposes to act or such Debenture Holder's title as the Board of Directors of the Bank thinks sufficient, may at the discretion of the Board be substituted and accordingly registered as a Debenture Holder in respect of such Debentures, subject to the applicable laws, rules and regulations of the Bank , CDS , CSE and SEC.
- (e) No change of ownership in contravention of the above conditions will be recognised by the Bank.

5.14 LISTING

An application has been made to the CSE for permission to obtain a listing for the Debentures and any shares which may be issued upon the occurrence of a Trigger Event and the CSE has granted its approval in-principle for the same. It is the intention of the Bank to list the Debentures in the Colombo Stock Exchange upon the allotment thereof.

The CSE however, assumes no responsibility for the correctness of the statements made or opinions expresses or reports included in this Prospectus. Admission to the official listing is not to be taken as an indication of the merits of the Seylan Bank PLC or of its Debentures.

5.15 RATING OF THE DEBENTURES

Fitch Ratings Lanka Limited has assigned a National Long Term Rating of BBB+ (lka) to these Debentures. Fitch Rating Lanka rates the proposed Tier 2 instrument one notch below the bank's National Long-Term Rating of 'A-(lka)' to reflect the notes' subordinated status and higher loss-severity risks relative to senior unsecured instruments.

5.16 COST OF THE ISSUE

The Directors estimate that the total cost of the Issue including the Listing fees, Trustee fees, Brokerage, Printing, Marketing, Stamp duties, Joint Managers and Registrars fees and other costs connected with the Issue will be approximately LKR 35 Million and will be funded by Seylan Bank PLC.

5.17 BROKERAGE & FEES

Brokerage at the rate of 0.15% of the nominal value of the Debentures will be paid in respect of the number of Debentures allotted, on applications bearing the original stamp of any bank operating in Sri Lanka or a member/ trading member of the CSE or People's Bank Investment Banking Unit, Capital Alliance Partners Limited or any agent appointed by the Bank involved in marketing of the Issue.

5.18 UNDERWRITING

The Debenture Issue is not underwritten.

In the event the Issue is not fully subscribed and the objective of raising Tier 2 capital is not achieved fully, the Bank would have to manage the credit growth and its composition. However, the Bank would be able to supplement this requirement to a certain degree with retention of expected profits. The risk of under subscription of the Debenture Issue can be mitigated by the competitive returns offered on the Debenture and the improved growth and financial performance of the Bank as the Issuer.

Further, the minimum amount of funds the Bank is required to raise from the Debenture Issue which will have a convertible option in compliance with BASEL III requirements to meet the Capital Adequacy Ratio requirements in 2018 is LKR 2.0 Bn and the Bank is confident that such sum can certainly be raised from prospective investors to the Debentures.

ANNEXURE – I CREDIT RATING REPORT

3/9/2018

[Press Release] Fitch Rates Seylan Bank's Basel III Sub Debt Final 'BBB+(lka)'

Seylan Bank PLC (/gws/en/esp/issr/83062152)

FitchRatings

Fitch Rates Seylan Bank's Basel III Sub Debt Final 'BBB+(lka)'

Fitch Ratings-Colombo-08 March 2018: Fitch Ratings has assigned Seylan Bank PLC's (A-(lka)/Stable) proposed Basel III-compliant subordinated debentures a National Long-Term Rating of 'BBB+(lka)'.

The final rating is the same as the expected rating assigned on 16 October 2017, and follows the receipt of documents conforming to information already received.

The debentures, totalling up to LKR10 billion, are to have maturities of five, seven and 10 years, and carry fixed coupons. The notes include a non-viability clause, and will qualify as Basel III-compliant regulatory Tier 2 capital for the bank. The bank plans to use the proceeds to fund loan growth, and to strengthen its funding and Tier 2 capital bases. The debentures are to be listed on the Colombo Stock Exchange

KEY RATING DRIVERS

Fitch rates the proposed Tier 2 instrument one notch below the bank's National Long-Term Rating of 'A-(lka)' to reflect the notes' subordinated status and higher loss-severity risks relative to senior unsecured instruments. The notes would convert to equity upon the occurrence of a trigger event, as determined by the Monetary Board of Sri Lanka.

Seylan's National Long-Term Rating is used as the anchor rating because the rating reflects the bank's standalone financial strength. Fitch believes that the standalone credit profile best indicates the risk of becoming non-viable.

Fitch has not differentiated the notching on the proposed notes from the notching on Seylan's legacy Tier 2 notes. This is because we assume that the authorities would step in late, moving the point of non-viability close to liquidation.

Fitch has not applied additional notching to the notes for non-performance risk, in line with Fitch's criteria, as they have no going-concern loss-absorption features and Fitch believes that write-down of the notes will only occur once the point of non-viability is reached.

RATING SENSITIVITIES

The rating of the notes would move in tandem with Seylan's National Long-Term Rating.

While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

Solicitation Status

Fitch Ratings was paid to determine each credit rating announced in this Rating Action Commentary (RAC) by the obligatory being rated or the issuer, underwriter, depositor, or sponsor of the security or money market instrument being rated, except for the following:

Endorsement Policy - Fitch's approach to ratings endorsement so that ratings produced outside the EU may be used by regulated entities within the EU for regulatory purposes, pursuant to the terms of the EU Regulation with respect to credit rating agencies, can be found on the EU Regulatory Disclosures (https://www.fitchratings.com/regulatory) page. The endorsement status of all International ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for all structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.
